Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3,10-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Crouch (WO 99/00297). Crouch discloses every aspect and limitation found in these claims. (see abstract and figure 2A)

3. Claims 1, 2, 6, 7-13,17 are rejected under 35 U.S.C. 102(b) as being anticipated by Lessen (3,881,669). Lessen disclose every element and limitation found in these claims. (see Figures 1, 2 and Col. 4, lines 20-25)

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-4 and 10-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Huenechke (6,513,716). Huenechke discloses every element and limitation found in these claims. (see Figures 7-9 and 12)

6. Claims 5 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crouch or Huenechke in view of Tangler (4,406,336). Neither Crouch nor Huenechke disclose a circular or elliptical cross section. Tangler however discloses that it is known to use an unstreamed element that has an elliptical cross section for exciting the instability modes. (see #21) It would have been obvious at the time of the invention to one having ordinary skill in the art to include the teachings of Tangler into the devices of Crouch or Huenechke for the purpose of reducing wake turbulence (see Col. 7, lines 5-30.)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen A. Holzen whose telephone number is 703-308-2484. The examiner can normally be reached on M-F 7:30 - 5:00.
